- › Performed Unit testing on AngularJs applications using tools like Karma and Jasmine.
- › Designed websites with great user experience using technologies like Node.js, Express.js and MongoDB.
- › Knowledge of web services and different RESTful API services using Ajax, HTML, XML, JSON, JavaScript, jQuery.
- › Experienced with MySQL and MongoDB database.
- › Designed chat application using Websocket.
- › Designed Logos for the companies using Photoshop.
- › Conversions of wireframes and Photoshop documents into functional CSS3, HTML4, HTML5 and JavaScript code.

WORK EXPERIENCE

+

March 2017 to Present (3 MONTHS)

FRONT END DEVELOPER

BrainWire.ai

- › This project is based on using artificial intelligence and technology to measure the behavior, stress, memory, concentration, and state of restfulness utilizing state of art neural network algorithms.
- › My role is accessing and extracting Rest APIs based data which is stored using OpenBCI and Muse EEG devices. My responsibilities also include provisioning access to this data from mobile devices and storing it in Firebase. The Firebase data undergoes further analysis in large, GPU based nodes. In addition, I work on headless/API based Front Ends, which are customer accessible pages. I primarily use AngularJs and Bootstrap Foundation to build the interface and Highchart.js to show the progress to the users.
- › Modern workflows and standards followed, including automation via grunt, bundling and minifying, and use of Webpack 2 for better page performance.
- › My duties also include designing and creating SVG based animations using Javascript to make attractive and engaging interfaces. I utilize a service worker for offline page/content access and to make for the best possible user experience.

Website for BigData company (June 2017)

- › Created a website for a BigData company. My job was to create the website from scratch using Wordpress (Php based framework). Bootstrap, CSS3 and Javascript used extensively for customization of different components.
- › Created Vector Scale Graphics to make the interface vibrant and light weight.
- › Customized multiple Wordpress Plugins to meet the customer requirement.

October 2013 - Feb 2017 (3 years 4 months)

FRONT END DEVELOPER

Projects

- › www.javascript.solutions
- › E-commerce interface project using AngularJs, Rest API and Bootstrap Foundation.
- › Hybrid mobile app using Ionic and Highchart.js. Used Chrome Dev Tool for remote debugging of the mobile application.
- › Stock market app using Angular, firebase, Ionic, Yahoo finance rest API.
- › App build in Ionic, Cordova and Angularjs for image capture and to store in Firebase.
- › Todo App built using Ionic and AngularJs Store Data in localStorage.
- › Blog created by using Node.js, Express.js and MongoDB.
- › Worked on projects, based on Facebook API, Youtube API, Rotten tomatoes API, Twitter and Data.gov API.
- › Created Hybrid App in AngularJs and Ionic with OAuth authentication to access Facebook feed using Facebook API.
- › Performed CRUD operations using Rest API and AngularJs.
- › jQuery mobile app using Swiper.js.
- › Single Page Application using Zurb Foundation, Scroll Magic and Greensock animation plugin.
- › Responsive homepage designed in Bootstrap for Wallnow.
- › Single Page responsive website using Webpack 2, babel and bootstrap foundation.

June 2010 - September-2013 (3 years 3 months)

FRONT END DEVELOPER

Infocore Solutions Pvt. Ltd

- › Worked on various client's projects and products building out CSS (Sass/Less), HTML/HTML5, JavaScript and AngularJs.
- › Responsibilities included creating Web designs, Responsive websites and interfaces, Single page applications, Mobile based hybrid apps, Wordpress theme customization, Front End maintenance, and debugging.
- › My specific area of expertise was working on CSS preprocessors (Sass/Less), focusing on reusability and modularity. Collaborated with the team using GIT.
- › My role also included developing pixel-perfect, cross-browser compatible interfaces while paying close attention to optimum page performance.
- › Participated in a structured software development process that included sprints with daily scrums, implementing feedback from quality assurance team members, and version controlled software releases(GIT).
- › Participated in solving user-testing issues to ensure new tools met the needs of members.
- › Interfaced with Account Managers and Quality Assurance Department to ensure that client deadlines were met.

April 2012- May 2013 (1 years 3 months)

FRONT END DEVELOPER

Project - Hawaii Travel Agency

- › Responsible for designing, developing, and the restructure of the entire website and created the homepage architecture as well as all of the inside pages following W3 standards with a focus on cross-browser compatibility. Used Tools like fiddler and chrome dev tool for debugging the code.
- › Fostered close communications while working with a large development team that included PHP developers and a front-end designer to ensure that the user interface remained true to spirit in all possible data scenarios.
- › Worked on angular based application for photo gallery and Hawaiian activities for customers. Styled the website using CSS3, HTML5 and Javascript.
- › Designed Homepage layout using Photoshop and wireframes.
- › Designed company's Logo using Photoshop.

- › Created a Bootstrap framework layout using the 12 column grid preferred by the designers as well as implementing Object Oriented CSS to cut down on repetitive code.

May 2013 - September 2013 (4 months)

FRONT END DEVELOPER

Project - Social Reality

- › Company was doing ad campaigns on Facebook using their platform called groupad. My job was to customize Ad templates and make them responsive using bootstrap and javascript/jQuery.
- › Tasks included slicing the template using Photoshop and converting it into HTML5 code.
- › Designed and developed the single page responsive website using bootstrap and javascript.
- › Created different cross-browser forms templates designs. Sliced PSD using Photoshop and hand coded div based responsive coding.
- › Used YSlow and chrome developer tool to ensure page performance quality.
